It is with pride that I introduce the 50th anniversary edition of the *Florida Library Directory with Statistics*. This edition celebrates fifty years of a continued commitment to provide Florida residents with library information. This publication contains statistical information regarding Florida's public libraries.

The collection and use of performance and resource data has become increasingly important. Each public library in Florida submits a statistical report to the State Library that provides information concerning budgets, collections and services. The Research Office in the Bureau of Library Development compiles and analyzes this data. In an age of accountability, these statistics play a key role by providing programs with information that was previously inaccessible.

Public library data is an important source of information used by local library managers and public administrators for planning, evaluation and resource allocations. This information is also important for academic and governmental researchers who investigate and develop public policy regarding information access and transfer. The information is submitted to the Federal-State Cooperative System for Public Library Data, a program of the National Center for Education Statistics.

Florida's quality library statistics are the result of a collaborative effort between local public libraries and the State Library of Florida. Many thanks to all who have contributed in achieving this milestone.
